Simon,

Last year, you made a few tags for us which integrated a new, very small PAR sensor from a third party. We are looking at designing our own instruments and would very much like to know where that PAR sensor came from.

Could you please please, let us know if you can provide any information about it? I've tried contacting Phil numerous times albeit unsuccessfully.

We would very much appreciate your assistance on this matter.

Sincerely,

Daniel Langis  
NOAA/PMEL Seattle, WA

Hi Daniel,

I can't see why not – we sourced the PAR sensors from Skye Instruments (<http://www.skyeinstruments.com/>)

Kind Regards,

Simon
