Good afternoon,

I'm working on putting together materials to submit a procurement request package for 16 iridium modules to be incorporated into the PopUp floats that we are developing in the ITAE program.

Do you know if purchasing these iridium modules will need a NOAALink worksheet?
Are these modules considered an IT purchase?

The modules will be physically mailed to the DoD Ditco network providers for them to be "whitelisted" before being built into the floats and deployed.

Thanks in advance for your help!

Kind Regards,
Sarah

Hello Sarah,

Yes, this is an IT purchase. NOAALink is only for contracting, not so Weining? So that sheet is not relevant to this purchase. What ia the total cost of the purchase?

Eugene

Total (and I just did a recount and determined I only need 15) would be \$3,749.25 .

So close to the purchase card limit!

Hi Sarah,

As Eugene mentioned below, these are considered an IT purchase and it's mandatory that NOAALink reviews the requirement first, so you will need to complete the NOAALink worksheet. The instructions for NOAALink worksheet can be found here:

<https://www.cio.noaa.gov/NOAALink/Submitting%20your%20requirement.html>

Thank you!

Weiming

Hello Eugene and Weiming,

Thanks for the direction. I wanted to check and see if the iridium modules fell under the "scientific equipment" exclusion for having to process the IT purchase order request through NOAALink. The modules will be integrated as a part into the PopUp floats. If you still think that these need to be taken through NOAALink let me know.

Eugene, can I request approval from you for purchasing these items? I will need to include your affirmation email in the procurement request package.

Thank you both!

Kindly,
Sarah

Hello Sarah,

Thank you for checking on these items.

1. Since these will be included in boeserving systems, please include these under the scientific equipment category.
2. You only need IT purchase approval by email from me for items under the Purchase card limit. Over that limit, there is another IT approval handled between Weinming and me (FITARA). So, you're good to go.

Best

Eugene
